Hi Shaun,

Just to let you know about the performance of our ESAB EAGLE Plasma Cutter, for the Precision Cutting of our Chromium Carbide liner plates:-

- Been under high pressure production constantly since commissioning some 3 years ago.
- Sometimes works for weeks on end on a "Double Shift" 24/7 basis.
- The etching facility is always used.
- The productivity of this machine is remarkable and to date your service and back-up is excellent.

A wise purchase!

Regards
