

Tough Professionals

For use with Oxy/Acetylene

Longlife - It's the toughest torch you'll ever handle. **Safety** - Lincoln design, quality control and reputation make this the 'safest' torch. **Professional Jobs** - Welds to 50mm and cuts to 150mm. **Total Versatility** - Weld, heat, cut & descale. Complies with EN ISO 5172.

FEATURES

- Stainless steel connection piece for unlimited life!
- Tough extruded brass torch handle. No vulnerable screws or soldered joints to leak! Simple to repair.
- Stainless steel ball valves for accurate flame adjustment, safe performance.
- Double "O" ring seal protected by nut for long life.

BENEFITS

- Flat seated cutting tips for longer life.
- Unique built-in safety plug.
- Solid forged brass head for strength.
- Accessible injector allows simple changeover to other fuel gases.
- Solid forged body and lever.

Cutting Attachment

Designed to last - tough forged brass head and body, with silver brazed triangular construction stainless steel tubes. Universal pressure mixer safety located in head. Unique Lincoln "safety plug" silver brazed into head, pops out when head is overheated, saving on costly damage to head. Cuts to 150mm thick. Assembles to handle with double "O" ring seals making handtight, leak proof joint.

Series 6290 Tips

Heating Tip

Lincoln tips have flat seats for simple repair and they damage less. Every tip is individually flame tested in our factory. There are 3 styles: **6290-AC** is our best seller. It is two piece (brass internal, chrome plated copper shell) with pre-heat slots and economically priced. It has extra pre-heat for all cutting conditions. **6290** is drilled and swaged copper. Normal pre-heat for cutting clean plate. **6290-S** is also drilled and swaged copper, but is extra pre-heat for all cutting conditions.
